

KeraTor Torque Tip - (Round head)

Kerator torque wrench driver has a round top connection compatible with most dental implant torque wrenches. It features a triangle driver connection on the bottom that fits every Kerator abutment. Kerator torque wrench driver is used to tighten the Kerator abutment to its recommended torque of 30Ncm into the osseointegrated implant fixture.

KeraTor Magic Tool

The Magic Tool is used to insert

The insertion end carries the retentive male cap and snaps it securely into place inside the metal housing. The removal end grabs the retentive male cap.

KeraTor CDPH Set

Each pack contains

- Red Male Cap
- Blue Male Cap
- Pink Male Cap
- Metal Housing (Octa)
- White Spacer Ring
